PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with 2+ years of professional experience specializing in high-performance, responsive frontend interfaces and seamless user experiences. Proficient in PHP (OOP), MySQL, JavaScript, HTML5/CSS3, and WordPress. Independently architected three enterprise internal portals that reduced operational reporting time by 60%. Skilled in REST API integration, technical SEO, and translating design concepts into scalable, production-ready code.

TECHNICAL SKILLS

Languages & Backend	PHP (Core & OOP), MySQL, JavaScript, HTML5, CSS3
CMS & Frontend	WordPress, WooCommerce, Custom Theme & Plugin Development, Elementor
API & Integrations	REST API Integration, SMTP Email Automation, Third-Party Service Integration
Database	Relational Schema Design, Query Optimization, Multi-User Data Architecture
Hosting & DevOps	cPanel, FTP/FileZilla Deployment, Domain Migration, SSL Certificate Management
SEO & Analytics	Technical SEO, Schema Markup, Google Search Console, Core Web Vitals Optimization
Tools	Git, GitHub, VS Code, Figma (Basic), ChatGPT, GitHub Copilot

WORK EXPERIENCE

Web Developer | Innoric Infosystems Pvt. Ltd. | July 2024 – Present | Full-Time
Gorakhpur, Uttar Pradesh, India

- Independently designed, developed, and deployed three enterprise internal portals using PHP OOP and MySQL — reducing operational reporting time by 60% and eliminating manual data tracking across company departments.
- Designed and launched multiple responsive, mobile-optimized production websites using PHP, WordPress, HTML5, CSS3, and JavaScript across healthcare, education, e-commerce, and corporate sectors — all delivered on time and within scope.
- Implemented SMTP-powered automated lead capture workflows across educational client platforms, improving student inquiry conversion rates and eliminating manual outreach effort entirely.
- Executed technical SEO campaigns including schema markup, meta tag optimization, Core Web Vitals improvements, and XML sitemaps — achieving measurable Google Search Console gains within 90 days of launch.
- Integrated REST APIs and third-party services into WordPress and custom PHP applications across multiple projects, extending functionality without degrading page performance.
- Managed complete hosting lifecycle: cPanel configuration, domain migration, SSL installation, and FTP deployment via FileZilla.
- Refactored legacy PHP codebases to address security vulnerabilities, reduce technical debt, and improve page load performance.
- Received Outstanding Project Contribution Award (2024) — sole development team recognition — for exceptional delivery and SEO-driven organic traffic growth on the KM Orgatronics project.

Web Development Intern | Sahind Technologies | 2024 | 45-Day Internship
Lucknow, Uttar Pradesh, India

- Completed structured full-stack web development training covering HTML5, CSS3, JavaScript, PHP, MySQL, and WordPress with practical project assignments.
- Contributed responsive web builds to active client projects under senior developer guidance, gaining hands-on experience in professional development workflows.

ENTERPRISE INTERNAL SYSTEMS

Three production portals independently conceptualized and built during employment; deployed and in daily active use across company operations.

DSR Management Portal

PHP OOP · MySQL · Role-Based Access · Analytics Dashboards

- Sole designer and developer of the company's Daily Status Reporting portal — a multi-user enterprise system that serves as the operational backbone for tracking client relationships, project timelines, employee task assignments, and daily working hours.
- Built a real-time management dashboard providing leadership with complete visibility into employee productivity, active project status, and cumulative delivery timelines — enabling data-driven operational decisions.
- Implemented role-based access control (admin and employee roles), ensuring secure, segmented data access across the organization.
- System has been in continuous daily use since deployment, replacing all manual reporting processes and directly improving project accountability and management oversight.

Pantry Internal Portal

PHP OOP · MySQL · Expense Management · Real-Time Reporting

- Designed and built a comprehensive pantry and kitchen expense management system to replace manual cash-tracking, managing inventory purchases, vendor payments, cash allocations, employee consumption, and client hospitality costs within a single platform.
- Implemented real-time expense monitoring and multi-category financial reporting, enabling administration staff to track daily spend and identify budget overruns proactively.
- Deployed and actively used daily by administration teams, providing complete financial traceability over all pantry operations and supporting accurate budget management.

Project Operations Portal

PHP OOP · MySQL · Portfolio Management · Pre-Sales Tool

- Built a centralized project portfolio system maintaining complete records of all company projects and deliverables — serving as the single source of truth for past project history and service capability.
- Engineered a dynamic showcase link generation feature allowing the sales team to share curated, client-specific project portfolios with prospective clients, directly supporting pre-sales demonstrations.
- Portal contributes to business development efforts by presenting company project quality and delivery depth in a professional, shareable format tailored per prospect — supporting client trust and new project acquisition.

CLIENT PROJECTS (SELECTED)

KM Orgatronics — Business Website

kmorgatronics.com

- Developed a responsive business website using HTML, CSS, JavaScript, and PHP, with a WordPress-powered blog section. Focused on UI/UX, performance optimization, and SEO. Received the Outstanding Project Contribution Award at Innoric Infosystems Pvt Ltd for successful project delivery.

Quran Tuitions — Education Enrollment Platform

qurantuitions.com

- Built an education enrollment platform with SMTP-automated lead capture and mobile-responsive interface, increasing student inquiry submissions and reducing manual follow-up.

Dr. Tayyeb Dental — Healthcare Website

drtayyebdental.com

- Developed a healthcare website with local SEO implementation, structured data markup, Google Maps integration, and appointment inquiry forms to maximize local search visibility.

DAC Furniture — Product Catalog Website

dacfurniture.com

- Created a product catalog site with dynamic visual galleries and responsive layouts, improving visitor engagement and product presentation quality.

HGTKU — Construction Company Website

hgtku.com

- Built a corporate website for a construction firm showcasing services, completed project portfolio, and company credentials — with on-page SEO applied for improved search presence.

EDUCATION

Master of Computer Applications (MCA)

June 2022 – May 2024
Maharishi University of Information Technology, Lucknow, Uttar Pradesh

Bachelor of Science (B.Sc.)

January 2019 – March 2022
Swami Vivekanand Subharti University, Meerut, Uttar Pradesh

CERTIFICATIONS & AWARDS

Outstanding Project Contribution Award – 2026

Innoric Infosystems Pvt. Ltd.
Recognized for independently leading, developing, and deploying the KM Orgatonics website, ensuring successful on-time delivery, high-quality execution, and measurable organic traffic growth.

Web Development Internship Certificate – 2024

Sahind Technologies, Lucknow — 45-day structured full-stack web development program.
